

SYNTHETIC PATIENT CHART - DEMO ONLY, NOT A REAL PATIENT

Patient: Maria S. Placeholder DOB: 11/03/1959 (age 66)

MRN: DEMO-000789                      Date of visit: 2026-06-06

Diagnosis: Pure hypercholesterolemia (ICD-10 E78.00)

History of ASCVD: coronary artery disease, stent 2021.

Prescriber confirms high risk for a further ASCVD event.

Lipid-lowering therapy history:

- Rosuvastatin 40 mg daily (high-intensity) since 2024-08-01, ongoing.

Most recent lipid panel (2026-05-15, on maximally tolerated statin):

- LDL-C: 58 mg/dL (at goal)

Plan: Patient requests evolocumab (Repatha). LDL-C is already well controlled below 70 mg/dL on high-intensity statin.

Patient is not on any other PCSK9 inhibitor, inclisiran, or alirocumab.

Prescriber: Dr. A. Gupta, Cardiology
